

Short Bio

Mehdi Rahimi was born in Shiraz, Iran, in 1978. He is an Associate Professor in the Department of Biotechnology, Institute of Science and High Technology and Environmental Sciences, Graduate University of Advanced Technology, Kerman, Iran. His research interests are in the areas of plant breeding (classical breeding, biometry, abiotic stress, molecular breeding, genomics, gene expression). He received his Ph.D. in plant breeding at Tarbiat Modares University during 2008-2013 and M.Sc. in plant breeding at University of Guilan during 2004-2007 and his B.Sc. in agronomy and plant breeding from Shiraz University.

Mehdi Rahimi is an Associate Professor in the Department of Biotechnology, Institute of Science and High Technology and Environmental Sciences, Graduate University of Advanced Technology, Kerman, Iran. He has Ph.D. in Plant Breeding with a strong background in classical breeding, biometry, molecular genetics, and abiotic stress research. He has dedicated his career to advancing research in this field, and He has published over 90 research articles in journals (Q1 to Q4), including publications in BMC Plant Biology, Scientific Reports, PLOS ONE, and Agronomy Journal.
